It is impossible for you.

maize quest 2018. maze quest 2

I've owned a couple prior versions of Airport Madness, and this is definitely the best by far. The new tower view makes the game so much more enthralling and fun than the others. Stellar work!. Terrible!

I read a couple reviews before i bought this game as it didnt look quite right to me. Those reviews said that it was smooth and fluid and really similar to its obvious inspiration in the 'Strikers' arcade series.

WRONG!!

This game is glitchy and controls terribly. I couldnt bring myself to finish the first level due to the player ship feeling heavy, unbalanced and anything but smooth.

I have a good enough specce'd PC to play most modern games and yet the frame rate of this game is jumpy and not what is expected from a fairly simple game.

Luckily i didnt pay the full price for this.

The most annoying this about this game is that it feels like it doesnt need much fixing to actually be good. My questio is why release a game that isnt finioished, the programmers obviously played it and didnt care.

The new 'TATE' mode doesnt actually work, it flips but in a widescreen fashion and doesnt actually scale to a full vertical aspect. this is one of their new features ???

One other review stated that ' All shmup fans MUST play this, Ignore this completely. If you are a casual gamer you might not notice the flawws. if you are a serious shooter fan then avoid at all costs, you will regret the purchase immediately.

lets hope its fixed in future.. Very surprised at so many negative reviews I thought this was an epic short horror experience felt like I was literally in the ring VHS and cheap as spaghetti

https://youtu.be/_Ofykn98DOo. Great sound effects.. This game is great fun to play and with more content it would be truly Awesome!

Also don't let the minimum system requirements put you off, I can run it on high settings 1080p with my Gtx 1050 2gb easily.

EDIT> This game has been abandoned.. An amazing game that provides nostalgia to the older 2D platformers, while still bringing lots of new things to the table!

Would recommend to anyone.

nice release, love the Aston Martin V12 Zagato and 2013 SRT Viper GTS. It is a PDF in you PC

. 6/10

It's okay, but really your money is best spent on other management sims. Very complex, very detailed, but with no real tutorial, and no guide that means plenty of time wondering what is going on and how to do simple things. The user interface is not really user friendly, it takes time to learn the basics. If they had a good tutorial that would no doubt make the game enjoyable, that said if you only like gridiron football management games, I know of none better than this game (that said I know of no other gridiron football management games period*), just with all the other games I have on steam, really a waste of money. I like it enough to probably play it once in a while from time to time, but really do not see myself getting more than 50 hours out of this game lifetime.

*=GLB is different to this, I do not consider that a management game

Note: if you love calling plays every single snap then it might be for you, just I find having to update my roster every week in relation to injuries a waste of time, really wish they had an auto function that would do that for me based on position depth...maybe they do mind you (I do not think so, I have looked and am pretty meticulous, just there is so much detail to this without direction that not sure if I just skipped over it...). could have a small human option but overall, awesome vr game!. I like this. Only improvement suggestion would be some terrain that could fit buildings from different terrain types. I ran out of some slots for some special buildings.
